

1902.

DESCRIPTIVE CATALOGUE  
OF  
**ORCHIDS.**

CHARLESWORTH & CO.,  
HEATON,  
BRADFORD.

W.B. & S.

Presented to the L. H. Bailey Hortorium  
by the Missouri Botanical Garden, 1972.

## **INTRODUCTION.**

---

IN presenting our Catalogue for 1902, we beg to thank our patrons for their past esteemed support, and assure them that the Plants offered in this issue are in every respect up to our high standard for health and vigour.

Owing to our increased stock, and the largely increased circulation of our Catalogue, the descriptions have had to be somewhat curtailed, but the particulars of the Plants are given as hitherto, as the arrangement has proved so satisfactory to distant clients.

In the course of the year importations are expected from all parts of the world, and inquiries will receive our best attention.

We should, however, warn our customers that owing to the unsettled state of Columbia, it is uncertain whether any importations of importance will arrive for some time. Particular attention, therefore, should be given to our fine stock of unflowered *Odontoglossum-crispum* and *Cattleya Mendelii*, *Cattleya Aurea*, &c.

The Cattleyas and Lælio-Cattleya hybrids contained in the Catalogue are a most interesting class of plants, possessing excellent constitutions, and are worthy of special attention.

### **Every Plant Catalogued is in our Nursery.**

Our prices will be found very reasonable.

We have a most interesting stock of Seedling Cattleyas, Lælio-Cattleyas, and Sophro-Cattleyas, probably the most varied in existence, and we shall be pleased to make offers to any of our patrons or friends.

The Plants are on Sale, on receipt of Catalogue, and can be seen at any time.

Plants delivered immediately on receipt of order, subject to being unsold.

All orders will be taken in strict rotation.

All plants GUARANTEED TRUE TO NAME and description: should any customer, on receipt of plants ordered, be in any way dissatisfied, the plants may be returned to us.

If, by accident, any plant flowers untrue to description the purchase money will be refunded, with 5 per cent. interest added, and no further claim admitted.

The Paintings of several of the very choice plants can be seen on application.

In sending order by post or telegram, it will be sufficient to quote numbers in catalogue.

**Telegraphic Address:—“CHARLESWORTH, HEATON,  
BRADFORD.”**

**Cable Address:—“FLORA, BRADFORD.”**

---

Tram Cars starting from Darley Street, Bradford, run every five minutes to Victor Road, Manningham; our Nursery is about six minutes' walk from this terminus.

# Special Novelties of Recent Introduction and Choice Varieties.

---

## No. 1 **Cattleya Dowiana aurea "Rosita."**

A most distinct and pleasing variety : of exquisite shape and novel colouring. The ground colour of the sepals and petals is of a creamy yellow, over which is a marbling and veining of a pleasing rose ; a particularly dark rich-coloured well-opened lip, adorned with beautiful golden-yellow veinings. Undoubtedly one of the finest varieties of this charming species ever seen.

Magnificent plant, 3 exceedingly healthy bulbs, all with leaves, making 2 exceptionally strong new growths. Price on application.

## No. 2 **Cattleya Fulvescens.**

The result of a cross between *Catt. Forbesii* × *Catt. aurea*. Pretty in form and distinct in colouring, of a peculiar pink-tinted yellow, the disc of the lip being rich orange with a delicate freckling of purplish-red in the centre. Award of Merit—Royal Horticultural Society, September 24th, 1901. Painting can be seen on application,

Strong healthy plant, 7 very fine bulbs, 6 with leaves, 1 strong lead. Price on application.

No. 3

**Cattleya Germania**

(Cattleya Schofieldiana × Cattleya aurea).

A very distinct hybrid showing a remarkable form of labellum, having the distinctly divided lobes as in *Catt. Schofieldiana*, which is characteristic of all hybrids with that species. The sepals and petals creamy-white distinctly tinged and veined with rosy lilac. The lip has the side lobe of pale rose colour; the front lobe is projected on a well defined isthmus, purple, with a lighter shade between the veinings, and a slightly granular surface. Award of Merit—Royal Horticultural Society, September 10th, 1901.

Strong plant, in robust condition, 5 magnificent bulbs, 4 with leaves, 1 strong lead. Price on application.

No. 4

**Cattleya Iris**

(Cattleya bicolor × Cattleya aurea).

An exceedingly fine and distinct hybrid with flowers measuring 5 inches across. The sepals and petals are of a pleasing hue, but one not easily described—a combination of rich bronze green and yellow, the latter showing in the delicate veining, more particularly near the margins of the petals. The lip is elongated and bilobed at the apex, deep purple, heavily shaded with crimson, and with a few very dark veins, towards the base; the small side lobes are blush; column white, shaded with purple.

This remarkable cross was awarded a First-class Certificate, Royal Horticultural Society, October 15th, 1901. Painting can be seen on application.

Very strong plant, 5 bulbs, all leaved, 1 strong lead.

No. 5

**Cattleya labiata alba  
“Heatonense.”**

A particularly fine form of this rare white *Cattleya*; of splendid size and substance, snow white, with a faint and pleasing tinge of rose pink in the front of the lip, which is very broad and open. Painting can be seen on application.

Beautiful healthy plant, 8 magnificent bulbs, 5 with leaves, 1 extra strong lead. Price on application.

No. 6

**Cattleya Leander**

(Catt. bicolor × Catt. speciosissima).

A pleasing hybrid, exactly intermediate in growth and flower. The sepals and petals are of a pleasing rose-pink. Lip bilobed and very wide, ground colour same as sepals and petals, almost covered with radiating veins and nerves of magenta-purple, a white distinct crisped margin; throat rich canary-yellow, through which extend the veins of the lip. A hybrid of great promise.

Healthy plant, 4 good bulbs, all with leaves, 1 good lead. Painting can be seen on application. Price on application.

No. 7

**Cattleya Lottie.**

A handsome hybrid between *Catt. Acklandiae* and *Catt. Trianae Backhouseiana*. It is a flattish flower, with soft purple sepals, flushed at the base with a deeper hue; petals broad and similarly coloured, the tips being deepest. The lip has a magnificent royal purple bilobed apex, a bar of yellow dividing this from the white base. Award of Merit R.H.S., Oct. 15th, 1901.

Strong healthy plant, 6 strong bulbs, 4 with leaves, 1 strong lead. Price on application.

**No. 8 Cattleya Percivaliana "alba."**

A pure white form of this species, and without doubt the most rare white *Cattleya* in cultivation. It is of good shape, and the only colour is the yellow in the throat as seen in all albinos of this section. Painting can be seen on application.

Fine healthy plant, 5 robust-looking bulbs, all leaved, 2 strong leads. Price on application.

**No. 9 Cattleya Schroderæ "Empress."**

A particularly handsome variety; sepals and petals broad, blush-white; a fine trumpet-shaped lip, broad and well frilled; the yellow of the throat runs well back, leaving a large front portion of pale mauve. A delicate and most pleasing acquisition.

Strong plant, 6 very fine bulbs, 4 with leaves, 1 good lead and flower sheath. Price on application.

## No. 10 **Cattleya Schroderæ “Ophir.”**

Distinct and pretty form; sepals and petals blush-white; lip very handsome, nicely frilled, the front being heavily blotched and veined with bright magenta-purple, quite distinct from the type; throat chrome-yellow, the colour running well back.

Strong healthy plant, 7 grand bulbs, 4 with leaves, 1 strong lead and flower sheath. Price on application.

## No. 11 **Cattleya Schroderæ “The Duchess.”**

Magnificent form; gigantic flower; sepals and petals exceedingly broad and of good substance; pale mauve lip of fine size and shape, a distinct zone of violet-purple running around the orange-yellow area of the throat, leaving a broad margin of pale mauve on the front lobe.

Extra strong plant, 6 specially strong bulbs, 4 with leaves, 1 strong lead and flower sheath. Price on application.

## No. 12 **Cattleya Trianæ “Godiva.”**

Description—*Gardener's Chronicle*, April 13th, 1901. A fine form; the segments of the flower nearly fill in a circle; the petals are nearly as broad as long, and the finely fringed and crimped front of the lip is also circular in outline; the base of the lip white tinged and veined on the outside with light purple. The disc of the lip is orange-coloured with fine white lines radiating from the base and the front ruby-purple, the colour getting lighter towards the margins and edges of the frilled side lobes.

Specially fine healthy plant, 11 magnificent bulbs, 7 with leaves, 3 strong leads, 1 with flower sheath. Price on application.

## No. 13 **Cypripedium Aureum "Surprise."**

A portion of the original plant. Undoubtedly one of the finest Cypripediums in cultivation. A cross between (*Sallierii Hyeanum* × *Spicerianum Magnificum*), raised by M. Jules Hye de Crom, of Ghent. The first sight of the flower gives one the impression of a mammoth form of a yellow Cypripedium Insigne. The flower, although large, is well proportioned. The colour throughout is a pleasing yellow, with veins and lines of a light green; dorsal shows an extraordinary large amount of white margin. It is a most stately flower.

Good healthy plant, 2 strong unflowered growths. Price on application.

## No. 14 **Cypripedium "Dora Crawshaw."**

**First-class Certificate, Royal Horticultural Society, November 6th, 1900.**

A fine distinct-looking hybrid, between *Cyp. bellatulum* and *Cyp. Charlesworthii "Mosaicum."* The lip bears a strong resemblance to that of the latter parent, whilst the fine substance of the flower is indicative of the former. The colour is purplish and rose, over which are displayed lines and veins formed of small spots. It is a most striking flower, and one of the best results achieved by hybridisation.

Good plant, 2 flowered growths, and 1 unflowered growth. Painting can be seen on application.

## No. 15 **Cypripedium Duncan.**

A very striking hybrid, the result of a cross between *Cyp. Boxallii atratum vivicans* × *bellatulum.* The influence of bellatulum is seen in the form and substance of the flower; petals, upper halves rich yellowish-brown, lower ones a lighter shade; dorsal sepal reddish brown, deeper at the base, as seen in *Cyp. Boxallii*; lip intermediate in shape, of a bright rich brown. Very fine plant, 1 strong flowered growth, and 1 strong unflowered growth. Price on application.

No. 16

**Cypripedium Godiva**(Cyp. *niveum* × Cyp. *Chamberlainianum*).

The hybrids of *Cyp. niveum* are all exceedingly pretty, and this new one is not an exception. A flower about the size of a good *Cyp. Chamberlainianum*, with broad, drooping petals, greenish, with lines, and suffusion of rose purple ; dorsal sepal a pleasing green, with lines of madder-purple, forming a suffusion of same colour at the base ; pouch is of the *niveum* shape, considerably enlarged, white, dotted all over with rose purple. The flowers are borne as in *Cyp. Chamberlainianum*, several on a spike, opening consecutively, and lasting many weeks in perfection. Painting can be seen on application. Good plant, 1 strong flowered growth, pushing new growth. Price on application.

No. 17

**Cypripedium Madonna**(Cyp. *œnanthum superbum* × *Leeanum Giganteum*).

An exceedingly pleasing hybrid ; petals broad, lower halves greenish yellow ; upper ones olive brown, with a dark bank of olive brown dividing the halves ; dorsal of good size, white, with a deep suffusion and veining of rosy-purple, and an intense middle band of purple-red ; a nice white margin ; pouch reddish-brown.

Magnificent plant, 2 strong flowered growths, and 1 strong unflowered growth. Price on application.

No. 18

**Cypripedium Maudiæ.**

Undoubtedly one of the finest hybrid *Cypripedium* ever raised. A cross between *Cyp. Lawrenceanum* "Hyeanum," crossed with *Cyp. callosum* "Sanderæ," and is as intermediate between them as could possibly be. The dorsal sepal is very broad and rounded ; the colour white, closely veined with bright green. Petals light green with darker veins and a few dark warts on the upper margins ; the lip is light green, as is also the scape.

The plant has an exceedingly fine constitution. The cross has received the First-class Certificate of the Royal Horticultural Society, 1901. Size and price on application.

## No. 19 **Cypripedium Telemachus.**

A very pretty *Cyp. niveum* cross; the other parent being *Cyp. Lawrenceanum*. Larger than most *niveum* crosses; the influence of *Cyp. Lawrenceanum* has considerably enlarged the dorsal; petals are broad and of good substance; the pouch is well proportioned. The ground colour of the flower throughout is white, dotted, veined, and flushed with a pretty rose-pink, more intense in the dorsal sepal.

Exceptionally strong flowered growth, 7 robust leaves, pushing 2 new growths  
Price on application.

## No. 20 **Cymbidium eburneo--Lowianum** “**concolor**”

**First-class Certificate, Manchester Orchid Society, March 21st, 1901.**

A hybrid of exceptional merit. It can be best described as a clear primrose-yellow variety of the fine hybrid *Cymbidium eburneo--Lowianum*, but without the V-shaped blotch in the front of the lip, the characteristic of the variety of *Cym. Lowianum* used in hybridisation. It is almost self-coloured, particularly delicate and pleasing.

Handsome plant, 6 extra fine bulbs, 4 with leaves, making 2 strong new growths.  
Price on application.

## No. 21 **Lælio-Cattleya Charlesworthii**

(*Lælia cinnabariana* × *Cattleya aurea*).

Painting can be seen on application. A very fine hybrid, intermediate in shape, and of exquisite colour; sepals and petals orange-scarlet, whilst the lip is covered with a considerably deeper shade of orange-scarlet, extending right up into the throat. Award of Merit, January 23rd, 1900, Royal Horticultural Society.

Strong vigorous plant, 7 very fine bulbs, all with leaves, 1 strong lead and flower sheath. Price on application.

## No. 22 **Lælio-Cattleya Charlesworthii “Princeps.”**

A most novel and pleasing variety of the former; the lip is exactly similar in colour, but the sepals and petals are of a clear bright yellow, giving good merit for the distinctive name applied.

Very fine plant, 8 very fine bulbs, 6 with leaves, 1 strong lead and flower sheath. Price on application.

No. 23

## **Lælio-Cattleya Dora**

(*Cattleya Schroderæ* × *L-C Phœbe*).

A very pretty hybrid. Almost a self-coloured flower. Sepals and petals are of good size and shape, of a pale Indian yellow; the lip is of a more intense shade of the same colour, partaking more after *Catt. Schroderæ* in shape. It promises to be a very beautiful hybrid.

Healthy plant, 5 very good bulbs, all leaved, 1 strong lead and flower sheath. Price on application.

No. 24

## **Lælio-Cattleya “Donna Roma”**

(*Cattleya granulosa “aurea”* × *Lælia tenebrosa*).

One of the most distinct and pleasing hybrids we have yet flowered. Exactly intermediate in shape: sepals and petals of good size, bronze green, almost covered with a peculiar network of irregular lines and veinings of a pretty cerise. Lip is bilobed, of a deep magenta in front; side lobes rich magenta; column white. A hybrid of great promise. Painting can be seen on application.

Very strong plant, 5 splendid bulbs, all with leaves, 1 of which is a very strong lead. Price on application.

## No. 25 **Lælio-Cattleya Galatea**

(*Laelia Dayana* × *Catt. granulosa Schofieldiana*).

An attractive flower; sepals and petals light purple, with a glossy surface; lip pale rose at base, the tips of side lobes and the elongated front lobe dark purple.

Strong plant, 5 fine bulbs, all with leaves, 1 strong lead. Price on application.

## No. 26 **Lælio-Cattleya "Haroldiana."**

A handsome hybrid, between *Cattleya Hardiana* and *Laelia tenebrosa*. The sepals are greenish yellow from base to centre, and crimson shaded at the tips. The broad petals are of a peculiar shade of red, with a suffusion of purple, and dull buff veins. Lip large and full, rich deep purple. The cross received a First-class Certificate from the Royal Horticultural Society, October 15th, 1901. Price on application.

## No. 27 **Lælio-Cattleya Luminosa.**

This is a magnificent hybrid between *L. tenebrosa* × *Catt. aurea*. Flowers are of fine size; sepals and petals straw-coloured, veined and suffused with purple; lip large, deep rosy-lilac, veined with a rich purple. Award of Merit, Royal Horticultural Society, November 12th, 1901. Painting can be seen on application.

Strong healthy plant, 6 very fine bulbs, 5 with leaves, 1 extra strong lead. Price on application.

## No. 28 **Lælio-Cattleya Martinetti**

(*Catt. Mossiae* × *Laelia tenebrosa*).

An attractive hybrid, which has produced a flower of fine size; sepals and petals intense rose-coloured; lip large and with veinings and deep suffusions of dark rose-purple. Painting can be seen on application.

Very strong plant, 6 strong bulbs, all leaved, 1 strong lead. Price on application.

No. 29

**Lælio-Cattleya Mozart.**

A most delicate and handsome hybrid from *L. Boothiana* × *L. purpurata*, exactly intermediate in shape; sepals and petals soft mauve; lip dark crimson in front with golden-yellow veinings in the throat. The plant possesses a good constitution and carries a fine spike of flowers.

Magnificent plant, 10 splendid bulbs, all with leaves; 2 exceptionally strong leads, with flower sheath. Price on application.

No. 30

**Lycaste hybrida.**

A distinct and exceedingly pretty natural hybrid, between *L. Skinnerii* and *L. Deppei*. The flower is over 4in. across, with sepals over an inch broad, suffused with light rosy purple, and spotted near the base on a white ground. The petals have the spots more in lines and even brighter in colour, while the lip is nearly white, blotched with purple on the front lobe, striped with crimson on the side lobes, showing characters derived from each parent.

Strong plant, 3 fine bulbs, 1 of which has leaves, 1 strong lead. Price on application.

No. 31 **Miltonia Bleueana Grandiflora  
Rosea.**

A most remarkable form of this lovely hybrid. Flowers are 4½in. in diameter and of exceptional substance. The rose-coloured portion of the flower is most pronounced. It is the best form we have seen of this hybrid, and worthy of a place in the finest collection.

Strong healthy plant, 3 fine bulbs, 2 with leaves, 1 strong lead. Price on application.

No. 32 **Odontoglossum Adriane**  
**“Duchess of Cornwall.”**

First-class Certificate, Manchester Orchid Society, March 21st, 1901.

One of the most distinct and handsome of the several forms which have been flowered. The flower is large, partaking more to *Odont crispum*, ground colour of a pleasing yellow, with numerous good-sized and smaller blotches of bright chocolate-red. The lip is heavily and prettily marked with the same colour.

Very strong healthy plant, 4 splendid bulbs, 2 with leaves, 1 extra strong lead with flower spike. Price on application.

No. 33 **Odontoglossum crispum “Dora.”**

Painting can be seen on application.

A first-class “*Crispum*” which, flowering for the first time from a very small bulb, gives great promise.

Flower of nice shape; clear white ground; the sepals and petals being heavily marked with large irregular blotches of bright claret-red; the lip is particularly wide, with numerous small spots of the same colour, and a large central blotch; a pleasing light yellow disc.

Nice healthy plant, 5 good bulbs, 2 with leaves, 1 good lead with flower spike. Price on application.

No. 34 **Odontoglossum crispum “Queen”**  
**Empress”**

First-class Certificate, Royal Horticultural Society, 12th March, 1901.

This is a lovely variety of the *Roseum* section. The flowers are about 4 inches in diameter; the sepals of a deep rose tint; the petals of a lighter shade; the lip is almost white, and furnished with a yellow disc. A portion of the original Certificated plant, which bore a raceme of nine flowers when exhibited.

Extra strong plant, 4 splendid bulbs, all with leaves, 1 very strong lead, with flower spike. Price on application.

No. 35

***Odontoglossum crispum***  
**“*Virginale.*”**

A portion of the original plant flowered by M. Jules Hye de Crom, of Ghent, and which is a most superior form. The flowers are of great size, the substance remarkable, a clear snow-white throughout, with the exception of the pale yellow disc.

Nice healthy plant, 2 good bulbs, both with leaves, 1 is a strong lead. Price on application.

No. 36

***Odontoglossum grande***  
**“*Aureum.*”**

Painting can be seen on application. A beautiful variety of this showy species; the markings, instead of being a rich brown, are of a pleasing clear yellow. It is a very rare plant and a decided acquisition.

Very fine plant, 5 strong healthy bulbs, all with leaves, 2 strong leads. Price on application.

No. 37

***Odontoglossum grande***  
**“*Distinctio.*”**

Painting can be seen on application. The name applied to this variety is very appropriate, for it is certainly the most distinct form yet seen. The ground colour and tips of the flower is a faint creamy yellow, the markings being of a peculiar shade, a mixture of reddish brown with a distinct hue of violet purple in the colouring; the markings of the lip are very light, which tend to further its distinctiveness.

Very fine plant, 5 strong healthy bulbs, 2 with leaves, 1 of which is a strong lead. Price on application.

No. 38

## ***Odontoglossum Hallii*** **“ Heatonense.”**

Unique form ; flower of good size ; sepals and petals self-coloured, deep reddish-chocolate tipped at the ends with bright yellow ; a well opened lip ; crest well spotted ; front lobe pure yellow. It is one of the best forms of this species yet seen.

Fine healthy plant, 4 strong bulbs, making a strong new growth. Price on application.

No. 39 ***Odontoglossum Prionopetalum***  
**(Special Variety).**

A very handsome form ; fine shaped full flowers ; light yellow shaded to white in the centre of its segments ; sepals and petals are heavily blotched and barred with dark chestnut-brown, the latter much toothed ; a large central blotch of chestnut-brown and several smaller spots. The variety is very superior to the ordinary forms of Odont Prionopetalum. Painting can be seen on application.

Strong healthy plant, 3 very fine bulbs, 2 with leaves, making a strong new growth.

No. 40 ***Odontoglossum Rolfeæ***  
**“ Reginum ”**

**(*Odont Harryanum* × *Odont Pescatorii*).**

An exceptionally fine form of this beautiful hybrid ; of exquisite shape and marvellous colouring ; the ground colour of sepals and petals is light yellow, although it is so largely covered that it is only observed in the centre and the edges ; the remainder is a suffusion of heliotrope, with large violet-purple blotches and bars ; the broad open lip has a white front, spotted all round the yellow crest with violet purple. It is a most handsome flower. Painting can be seen on application.

Very fine healthy plant, 3 very fine bulbs, 2 with leaves, 1 strong lead. Price on application.

## No. 41      **Sophro-Cattleya "Nydia."**

**First-class Certificate, Royal Horticultural Society, November 12th, 1901.**

Painting can be seen on application.

A fine hybrid between *Sophronites grandiflora* × *Catt. calummata*, and one of the best results achieved with the use of the brilliant vermillion-scarlet Sophronites. Flowers are of good size and exceptional substance, uniform dark scarlet in colour, with small purple spots on the sepals and petals.

Very fine healthy plant, 7 grand bulbs, 6 with leaves, 1 strong lead. Price on application.

## No. 42      **Sophro-Lælia "Eros"**

(*Lælia elegans "Turnerii"* × *Sophronites grandiflora*).

**First-class Certificate, Royal Horticultural Society, October 28th, 1900.**

Painting can be seen on application.

Flowers of fine size, and form wax-like in texture; bright dark scarlet. Base of lip yellow with scarlet lines. The front lobe of the lip bears a good resemblance to some of the forms of *Lælia elegans*.

Grand plant, 7 strong bulbs, 6 with leaves, 1 is a strong lead. Price on application.

## No. 43      **Sophro-Lælia Gratrixæ**

(*Lælia tenebrosa* × *Sophronites grandiflora*).

**Award of Merit, Royal Horticultural Society, September 10th, 1901.**

A richly coloured hybrid, with flowers strangely like those of *L. tenebrosa* in shape, though much smaller. Sepals lanceolate, purplish-red, tinged with orange colour; petals ovate, acuminate, and similar in colour to sepals; lip purplish-red, with purple veining. The blending of the colour gives a glowing appearance to the flower and renders it very attractive. The plant when shown was small and flowering from 2 leads, so that we are confident that this will prove when grown, the best Sophronites cross yet flowered.

Good healthy plant, 4 strong bulbs, all with leaves, making 2 strong leads. Price on application.

No. 44

**Sophro-Lælia Psyche**

(Lælia cinnabrina × Sophronites grandiflora).

A very pretty and pleasing little hybrid of the section ; petals and sepals reddish-purple, tinged with orange ; lip of a much deeper purple, with yellow veining extending into the throat.

Very fine plant, 10 bulbs, 2 strong leads, 1 flower sheath. Price on application.

### CATTLEYA AUREA (Unflowered).

Our type of Catt. Aurea is so well known that description is hardly necessary. We have imported them for a great number of years, and claim to have introduced amongst our "Aureas" most of the Cattleya Hardyana hybrids in cultivation. The plants catalogued are a most distinct looking sturdy batch of this lovely species, and we offer them with the greatest confidence.

113	Exceptionally strong healthy plant, 10 grand bulbs, 6 leaves, 1 strong lead	2 12 6

**CATTELYA MENDELII.****SPECIALLY FINE STRAIN.**

The following are an exceptionally fine, healthy batch of plants, which are worth special attention. Owing to the prolongation of the revolution in Columbia, this lovely Cattleya has become exceedingly scarce in the country. The type is the best of any form imported, the flowers being of splendid shape, with dark much-frilled labellums.

## DENDROBIUMS.

We have much pleasure in calling special attention to our Dendrobiums, which are in particularly fine condition, and as they are nearly all showing remarkably well for flower, immediate orders will ensure a fine display of bloom.

## **ODONTOGLOSSUM CRISPUM established Unflowered.**

With the continuance of the Columbian revolution, and the consequent stoppage of imported plants, the following are worth special attention. Our strain is too well known to need description, and the immense quantities we have disposed of during the last few years convinces us that our plants have given satisfaction everywhere.

Good spotted forms are continually flowering from amongst these plants, which we recommend to our customers with every confidence, they being clean, healthy, and vigorous; almost every plant will flower during the coming season.

1954	Very good plants, 3 and 4 strong bulbs, well leaved, 1 strong lead ...	0 5 0
1955	<b>Odont. FASCINATOR.</b> A remarkably handsome <i>Odontoglossum</i> , which we should say is a natural hybrid between <i>Od. crispum</i> and <i>Od. Adriane</i> . It is of fine shape, inclining to <i>Od. crispum</i> , heavily spotted throughout and with a good open lip; an improvement on <i>Od. Adriane</i> . A fine acquisition. Extra strong healthy plant, 3 grand bulbs, 2 with leaves, 1 strong lead with flower spike, pushing 2 strong new growths ...	52 10 0

## ODONTOGLOSSUM GLORIOSUM.

Beautiful Healthy Plants.

# LIST OF SUNDRIES.

THE following Articles are all of the finest quality, and we can highly recommend them; having used them ourselves for a number of years, we can testify to their being absolutely indispensable for the good cultivation of Orchids.

**LEAF SOIL.**—We are continually receiving inquiries for Leaf Soil, as used by us, and are prepared to supply our customers with same, made ready for use, which will be found far more economical than peat; **7/6** per Sack.

Selected **ORCHID PEAT**, exceedingly fibrous, from the best Hampshire grounds. Owing to the scarcity of first-class peat, we are compelled to raise the price to **12/6** per Sack.

**SELECTED SPHAGNUM MOSS**, Thick-headed and Green, the best Moss obtainable, **3/6** per bushel; **10/-** per Sack.

**THE WEST POT-SHAPED TEAK BASKETS**, well recommended; very neat, well adapted for Cattleyas and Dendrobiums, **1½d.** per inch: as for instance, 4 inches deep by 4 inches across, **6/-** per Dozen.

**ORCHID PANS**, well Perforated, neat in appearance, and very durable.

**LATH ROLLER BLINDS** (Our own Manufacture).

They are neat in appearance, and whilst admitting the requisite amount of light, form the most effective shading possible. Further, they afford an excellent protection against frost during the severe weather. We have supplied several of the leading Orchid establishments with these blinds, which have given every satisfaction. We have had them in use ourselves for several years and calculate that these blinds have saved us 50 per cent. in canvas shading formerly used.

As we have considerably improved our plant for this work we can now offer them at **1/9** per square yard **Unpainted**.

We shall be pleased to give further particulars on application.

## *Importations at present on hand.*

# VANDA CŒRULEA.

(THE BLUE ORCHID.)

**Arrival of a magnificent importation.**

---

We have just received a splendid consignment of this popular and showy **VANDA**.

# **SPECIAL OFFER.**

## **IMPORTATIONS JUST RECEIVED.**

We have great pleasure in being able to offer the following Choice Importations to our Customers. The plants have had a very quick passage and have arrived in excellent condition.

The present is a most suitable time for potting them up, and good results may be anticipated.

A LARGE AND FINE CONSIGNMENT OF THAT  
MOST USEFUL SPECIES ✱ ✱

## **Dendrobium Phalænopsis Schroderianum**

The wonderful variation of this species, from pure white to the most brilliant cerise, its free habit, and attractive formation and lasting qualities of its flowers make it of interest alike to amateur and florist.

A WONDERFUL CONSIGNMENT, INCLUDING  
MANY FINE SPECIMEN PLANTS OF ✱

## **Phalænopsis Rimestadtiana**

One of the most remarkable introductions of recent years, possessing a wonderfully fine constitution. Its lovely pure white flowers are of great size and graceful formation.

Grown in pots or pans with a small percentage of leaf soil (broken decayed leaves), we have found them grow with astonishing freedom.

A SMALL CONSIGNMENT OF VIGOROUS PLANTS OF  
**The New Cypripedium Glaucophyllum, Vanda Lowii, Cypripedium Niveum,  
Vanda Hookeriana, Cypripedium Lowii, Arachnanthe Moseifera.**

PARTICULARS ARE GIVEN OVERLEAF.

## Cypripedium Niveum.

A	Strong plants, 1 and 2 nice vigorous growths ...	...	...	...	...	...	3s. 6d. each
B	Very fine plants, 2 fine vigorous growths ...	...	...	...	...	...	5s. od. each
	A few specially fine clumps with 6 to 8 fine growths	...	...	...	...	...	21s. od. each

## Cypripedium Glaucocephalum.

### NEW SPECIES.

This new species is of the Cyp. Chamberlainianum section, producing its flowers in a similar manner. Considerable variation has been noticed in their native habitat, the labellums vary from light rose-spotted to light violet colour. The plants offered are specially fine, and were sent home in their native flower pots; they will shortly show flowers.

A	Strong plants, with 2 strong growths ...	...	...	...	...	...	£1 5s. od. each
B	Specially fine plants, 2 and 3 extra strong growths ...	...	...	...	...	...	£1 11s. 6d. each

## Vanda Lowii.

The two fine specimens of this wonderful and curious species travelled in their native flower pots, and are exceedingly fresh looking and vigorous.

	£	s.	d.
1. Fine specimen with strong stem about 2 ft. high with 13 splendid leaves, making a strong new leaf ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... 6 6 0			
2. Wonderful plant (in large native pot) with 3 exceedingly fine stems, about 2 ft. high, with 10, 11 and 13 leaves, each stem growing vigorously and making a strong new leaf ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... 15 15 0			

## Vanda Hookeriana.

A Fine fresh-looking stems, with 8 to 12 robust leaves ... ... ... ... ... ... ... ... 10s. 6d. each
B Very fine stems, with 10 to 15 robust leaves ... ... ... ... ... ... ... ... 15s. od. each
C Extra fine stems, with 10 to 15 specially strong leaves ... ... ... ... ... ... ... ... 21s. od. each
